

## **Aims and Scope**

*The Advanced Energy Systems and Intelligent Geoscience (AESIG)* is a professional academic journal focused on the cross-disciplinary integration of energy physics and computational intelligence, aiming to provide the latest research results, scientific discoveries, industry trends, and policy analysis for the target readership. The content of the journal covers a wide range of topics related to modern energy engineering, including but not limited to experimental characterization of porous media, high-performance numerical simulation, AI-driven optimization, and carbon-neutral energy technologies. Each issue will delve into relevant topics and combine theory with practice to help readers better understand and master the core points of complex energy systems and their digitalization. At the same time, the journal encourages interaction with readers, regularly organizes expert forums and academic exchange activities, and provides readers with opportunities for dialogue with industry authorities. By inviting global experts and scholars to write column articles, the journal presents cutting-edge insights and experiences to readers. Whether you are a practitioner in the energy and computing sectors or an ordinary reader interested in sustainable development and smart energy, *Advanced Energy Systems and Intelligent Geoscience* will provide you with a new perspective to help you gain a deeper understanding and participate in this innovative and challenging industry.

## **Editorial Board**

### **Chair of the Editorial Board**

**Prof. Yuhui Zhou**

Yangtze University, China

**Prof. Prof. Xiang Rao**

Yangtze University, China

### **Editorial Board Members**

**Dr. Yunfeng Xu**

Yangtze University, China

**Mr. Peng Cao**

CNPC R&D (DIFC) COMPANY LIMITED

**Dr. Xupeng He**

Saudi Aramco

**Dr. Huiru Sun**

Monash University

---

## Editorial Office

**Support Email:** [aesig@mospbs.com](mailto:aesig@mospbs.com)

**Address:** No. 1 Daxue Road, Caidian District, Wuhan, Hubei, China.

### Editor-in-Chief

**Yuhui Zhou** (Email: [zhyhtree@yangtzeu.edu.cn](mailto:zhyhtree@yangtzeu.edu.cn))

**Xiang Rao** (Email: [raoxiang0103@163.com](mailto:raoxiang0103@163.com))

### Associate Editor-in-Chief

**Yunfeng Xu** (Email: [xyf24796@163.com](mailto:xyf24796@163.com))

**Peng Cao**

**Xupeng He**

**Huiru Sun**

### Managing Editor

**Xiang Rao**

### Handling Editors

**Yunfeng Xu**

### Editor

**Yunfeng Xu**

## Publisher

**Macao Scientific Publishers (MOSP), Macao, China**

Email: [journal-office@mospbs.com](mailto:journal-office@mospbs.com)

**Publisher Address:** Block 11/F, Hengchang building, Nanwan Avenue, Macao, China

**ISSN:** 3106-9886 (Print), 3106-9894 (Online)

**Published:** February 2026

# CONTENTS

Vol. 2, Issue. 1 ( 2026 )

## • Review •

- 
- A Review of Numerical Simulation and Connectivity Analysis in Complex Media Reservoirs** .....  
..... Wentao Zhan, Yixin Zhang, Liang Pu, Zhaolin Pu 4
- Research Progress on CPU/GPU Heterogeneous Parallelism and Efficient Solvers in Large-Scale Complex Reservoir Simulation** .....  
..... Kang Wang, Xiang Rao 32

## • Article •

- 
- A Numerical Study of Hydraulic Fracture Growth Under One Cyclic Injection** .....  
..... Seqiang Zhuo, Zaile Zhou, Yinglun Qin, Yuzhu Kang, Hui Zhao, Lie Kong, Zhihong Kang 43
- Numerical Simulation and Sensitivity Analysis of Key Parameters for Modified Silicon-Based Nanoparticle Enhanced Oil Recovery in Low-Permeability Reservoirs** .....  
..... Chen Zhang, Xiang Rao 67
- Study of Methane Hydrate Phase Transition and Multiphase Flow Characteristics: Effect of Pressure and Initial Hydrate Saturation** .....  
..... Huiru Sun 83
- Study on High-Performance Prediction of Wellbore Multiphase Flow Pressure Drop Distribution Based on Artificial Neural Networks** .....  
..... Xi Ouyang, Xiang Rao 91
